<<Signature of the Supervisor>>

<<Name of supervisor>>

<<Academic Designation>>

<<ID of Supervisor>>

<<Department of Supervisor>>

## 5) Background and objectives of the project assigned:

I used this image as my project background so that it looks like a attractive one. And I have included this image for all pages except about us and contact us, because it looks odd for those pages. Thereafter Background information serves the purpose of making readers aware of what is going to be discussed in the essay. It makes readers conscious of the pros and cons of the topic, and readies them to explore it further. It also presents a good assessment of what is to come. In a way, it enables readers to predict what is to come next, and how it is to be presented.

## Outcomes of the project:

Online Mobile Recharge is a web-based application developed in ASP.NET to recharge mobile phones. The project focuses at providing an easy and reliable platform to recharge mobile of any telecommunication company through online without buying recharge card. The registered users of the system can recharge their prepaid mobile phones from anywhere at any time. The proposed project for recharging mobiles developed to automate the mobile recharging process. It roots out the manual card system of recharge and introduces a new and genuine online recharge process. The online mobile recharge system is beneficial to both the admins and users. Using the online application, the admin can add new operators, tariff plans, offers and update or modify the existing tariff plans. It helps the users in creating their account, and then recharging the mobiles phones at any time.

**Advantages:**

- This is useful for customer to recharge mobile from anywhere and anytime.
- Easy to get information as per requirement.
- More user friendly since .net is an easy language.
- Maintain history of past as well as present recharges.
- Reduces paperwork.
- Very easy to maintain data and information about data.

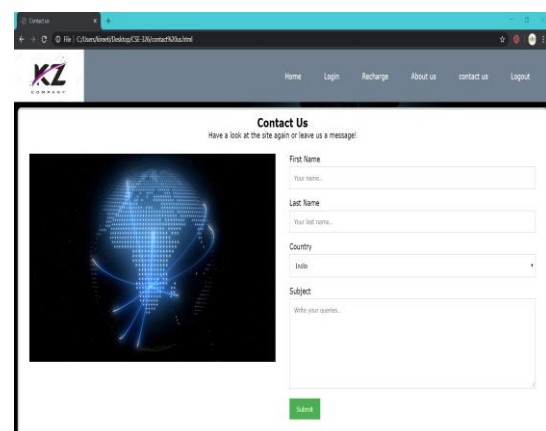

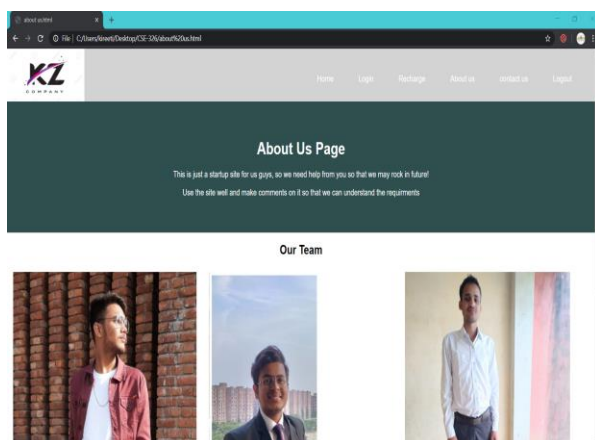

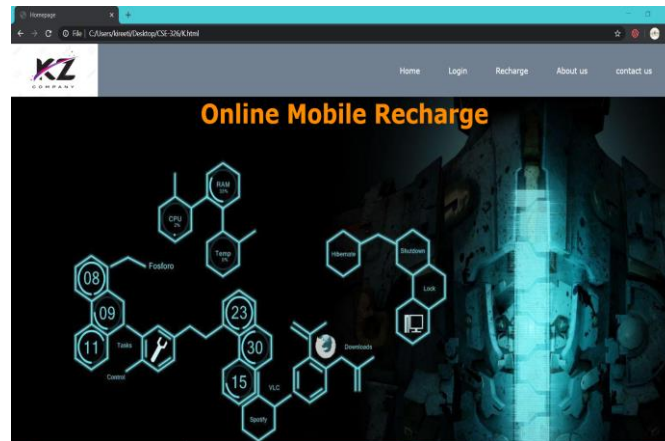

**Motto:**

My mobile Recharge that floated to aggregate, commoditize and distribute the services in most convenient form to the consumers. The motto of the company is to give convenience and value to all its customers who are looking for online mobile recharge related services. As a corporate we are committed to develop new strategies and influence business transformations with smart thinking expertise. Our business expertise aims to address the prevailing gaps in various service sectors. We Endeavour to influence business service modules by riding on the advantage of IT innovations. We work towards creating a technological environment which delivers high performance, saves time & money and higher customer satisfaction within the service sectors.

Online Mobile Recharge Service Provider including all major mobile operators and DTH recharge. Become a part of this giant in a really small investment. Start today for a better future. Start your own mobile recharge business with us. Establishment of higher marketing standard is a key of global market structure. Every financial standard and life standard of people is always depends on marketing strategy. Impost Money brings you a standard and all new marketing plan in network marketing.

### 6) Description of project:

We have made 9 modules for the sake of project so that it will work perfectly without any problems and created 3 style pages to keep the content safe and not to tolerate the styling of the code be difficult for us and of course the readers of the project. And coming to the pictorial flow chart of the project looks somewhat pretty.

## **7) Description the work division among us:**

Actually we have planned it before but due to some reasons and with the lockdown we have face so many problems so we have decided to share the files separately and divide our work among ourselves. We have divided the work into 3 parts:

### **1) Coding:**

Venkata kireeti savarala Roll. No: 43 has done the part of coding and of Corse some of the designing part of the website and he has done the loom video that was shared on the Github link.

### **2) Designing:**

Sanjeev Roll. No: 42 has done the part of designing and made the report on word and he also suggested some pages so that the work is little bit easy for making the project complete in time.

### **3) Written:**

Arun kumar Roll. No: 44 was helped to do the report work and the images for the project and some information about the project and included it in the report so that it became easy for us to deal with the project in time.

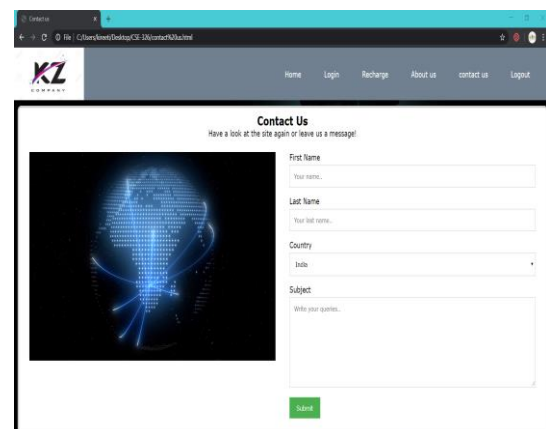

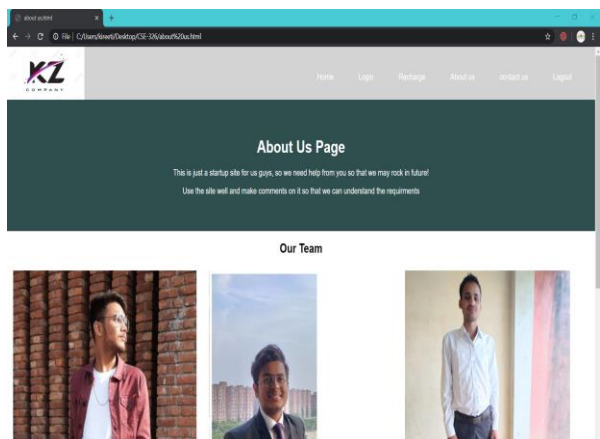

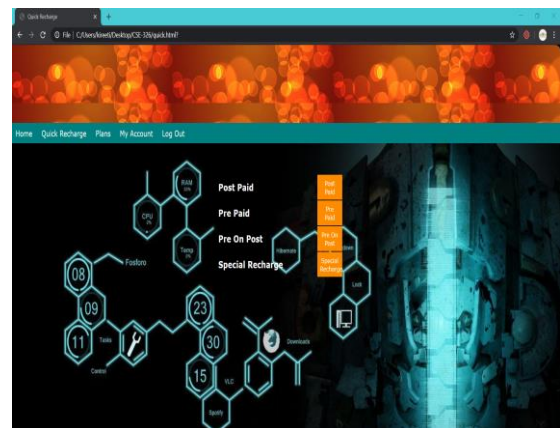

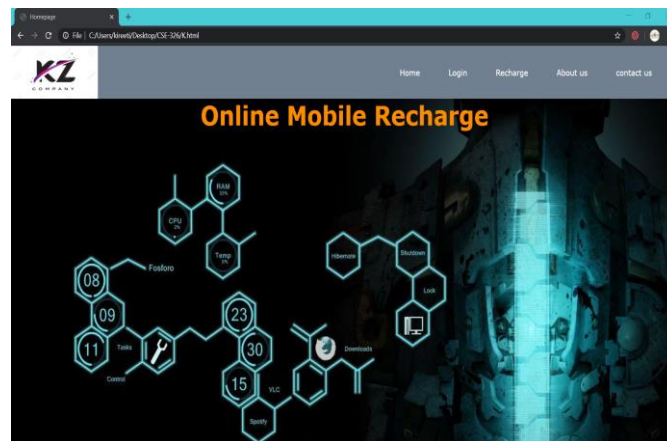

After all we shared the files among us and observed the project clearly so that there should be no errors or faults to make project odd one. And we had clear with the work and got some time to submit to you.

## 8) Implementation of scheduled work of project:

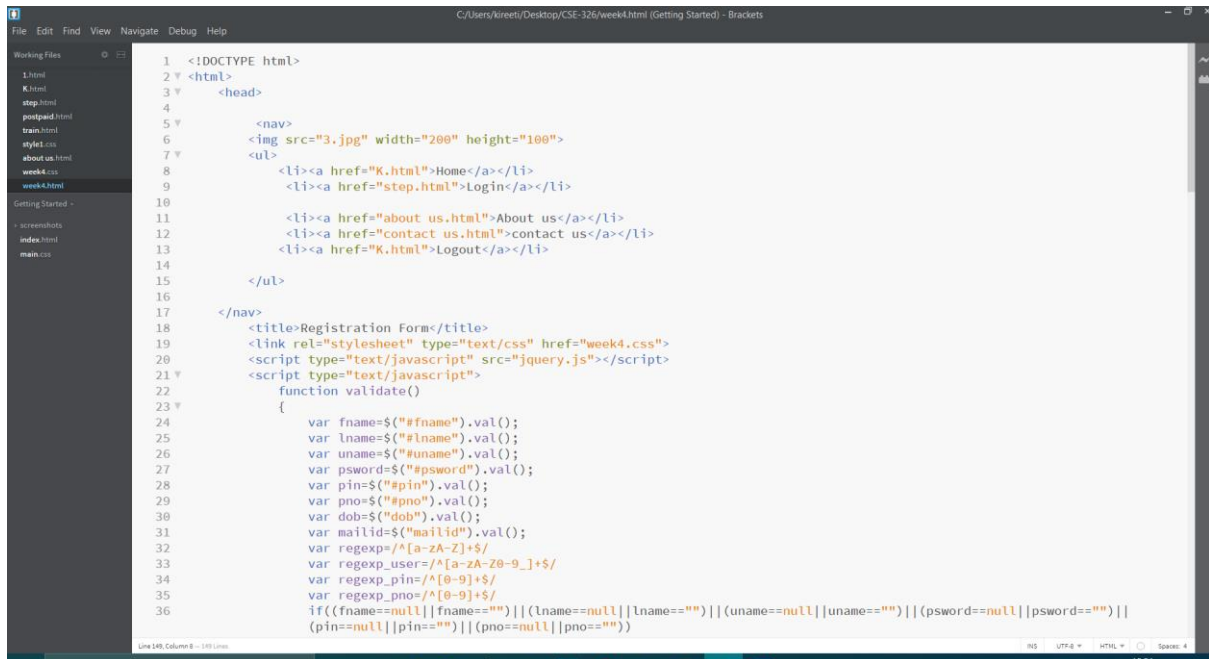

We have made the project effective by designing in the same style but with extra features like I also include java script to do the validation for the project while signup into account.

The website is very easy to understand and everyone including small kids can operate this website easily.

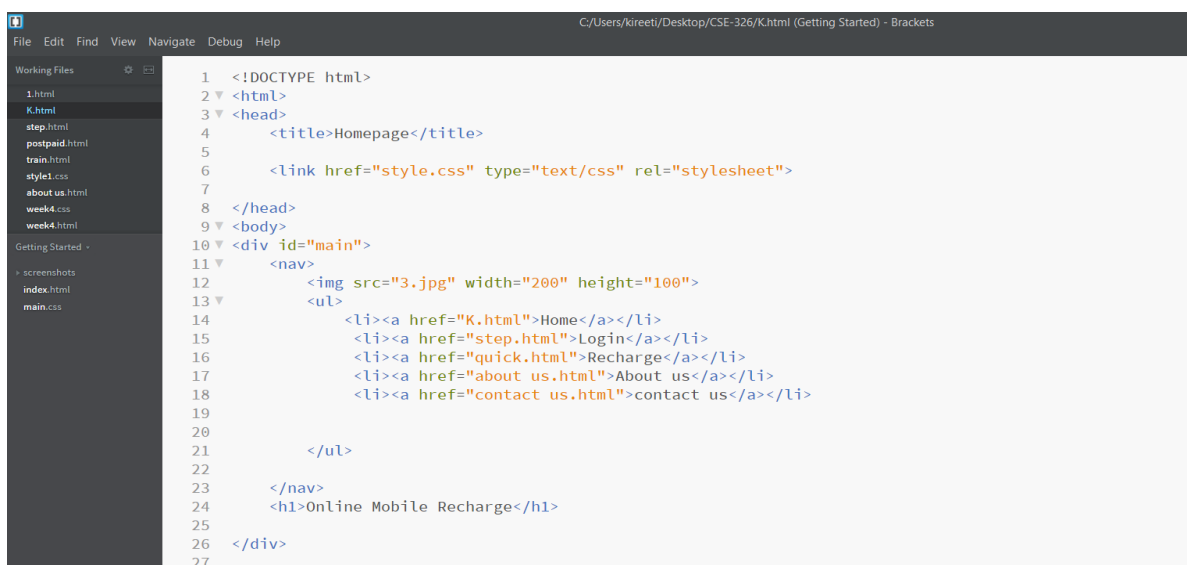

## 9) Technology and Framework to be used:

We guys have used Brackets for the coding part so that it is easy for us to quickly and understand the errors and solve them and also we have included the java script for the validation of the content given by the user and signup page. You can check while u seeing the project and we have included the images which are taken from google but with 4k resolution so that there will be no clarity problems and easily fix into the background.

```
1 <!DOCTYPE html>
2 <html>
3 <head>
4
5 <nav>
6 
7 <ul>
8 <li><a href="K.html">Home</a></li>
9 <li><a href="step.html">Login</a></li>
10
11 <li><a href="about us.html">About us</a></li>
12 <li><a href="contact us.html">contact us</a></li>
13 <li><a href="K.html">Logout</a></li>
14
15 </ul>
16
17 </nav>
18 <title>Registration Form</title>
19 <link rel="stylesheet" type="text/css" href="week4.css">
20 <script type="text/javascript" src="jquery.js"></script>
21 <script type="text/javascript">
22 function validate()
23 {
24     var fname=$("#fname").val();
25     var lname=$("#lname").val();
26     var uname=$("#uname").val();
27     var psword=$("#psword").val();
28     var pin=$("#pin").val();
29     var pno=$("#pno").val();
30     var dob=$("#dob").val();
31     var mailid=$("#mailid").val();
32     var regexp=/^[a-zA-Z]+$/;
33     var regexp_user=/^[a-zA-Z0-9_]+$/;
34     var regexp_pin=/^[0-9]+$/;
35     var regexp_pno=/^[0-9]+$/;
36     if((fname==null||fname=="")||(lname==null||lname=="")||(uname==null||uname=="")||(psword==null||psword=="")||
    (pin==null||pin=="")||(pno==null||pno==""))
```

You can see that is the Brackets platform in which we have done the coding part and the java script is also can be seen in the same image if u observe carefully.

## **10) SWOT Analysis achieved in project:**

### **Strengths:**

- a) Project has effective information on the basis of online recharge for users.
- b) The supply chain management is simple and easy.
- c) It is helpful to the age from children to adults.

### **Weaknesses:**

- a) As it is a new website there are no users.
- b) Some problems may arise but we fix them soon.
- c) Animation is not done.

### **Threats:**

- a) Competitors like Airtel, idea, Jio, Freechagre etc. are similar to this website.
- b) Price among the competitors is the big risk.
